FOR IMMEDIATE RELEASE:

PCWA Water Project in Christian Valley Area

AUBURN -- A water system improvement project will impact traffic flows in the Christian Valley Road area, beginning Dec. 1, the Placer County Water Agency announced this week (Nov. 19).

PCWA project engineer Rick Lund said the work sites are located along Christian Valley and Bancroft roads on the southern and western sides of Halsey Forebay.

The project contractor, Mountain Cascade, Inc. of Livermore, will encase 800 feet of the Bowman Canal along Christian Valley Road in 42-inch pipeline and will replace 1000 feet of old leaking pipeline with new 36-inch pipeline along Bancroft Road.

Lund said the work is scheduled from Dec. 1 through mid-April and will cause periodic traffic impacts and delays of up to 15 minutes at times. Christian Valley Road will be limited to one lane at times. Signs have been posted in the project area.

“The water agency and the contractor will make every effort to keep traffic disruptions to a minimum,” Lund said. Work will be limited to weekdays between the hours of 7 a.m. and 4 p.m.

PCWA will bypass water around the job site to supply downstream canal water users as well as water treatment plants operated by PCWA and the Christian Valley Park Community Service District. No impacts are anticipated for water users in the area.
